

- 10+ years of **leadership experience**
- Proficient in **Python, C, C#/.NET, SQL, Java, C++**
- Experience with **Firebase, PCL, Open3D, OpenCV**
- Patient, collaborative, strong communicator, self-starter with proven teamwork and leadership experience

EDUCATION

Bachelor of Science in Computing Science, Minor in Math (GPA: 3.87)

Expected to Graduate December 2025

MacEwan University, Edmonton, AB

- Experience with Python, C, C#.net, SQL and Azure Data Studio
- Built a fully functional game in Python
- Courses in Machine Learning, Data Mining, Artificial Intelligence, Robotics, Software Engineering, Databases, Data Structures, Object-Oriented Programming, UX/UI Design
- Mathematical Courses in Calculus I, II, & III, Linear Algebra I & II, Graph Theory, Set Theory, and Logic
- Statistics Courses in Probability and Regression

Bachelor of Science in Mechanical Engineering Co-op

Graduated December 2016

University of Alberta, Edmonton, AB

- Built intuitive foundation of Mechanics and 3D Modelling using SolidWorks
- Coursework in Thermodynamics, Heat Transfer, HVAC Systems, Mechanical Design, Fluid Mechanics, Electricity and Magnetism, Classical Mechanics, Quantum Mechanics

PROJECTS

Tutle | IN PROGRESS

Commercial Tutor-Student Marketplace Platform

- Co-leading 7-person team building cross-platform mobile app (React Native/PostgreSQL/Supabase) with Stripe payments, real-time location services, and session management
- Designed innovative gamification system to boost student engagement; responsible for technical architecture, sprint planning, and security implementation

ALS Speech Biomarker Classification | IN PROGRESS

IEEE ICASSP 2026 SAND Challenge

- Developing audio spectrogram transformer for dysarthria severity classification
- Processing phonation-based speech data for multi-class classification and progression prediction
- Implementing data augmentation techniques to address severe class imbalance

Mentor Match | COMPLETED

Mobile Tutor-Student Matching Application

- Led team of 5 to build Android app using Kotlin/MVVM architecture with Firebase backend
- Won 1st place in class competition among 12 teams judged by CS faculty
- Implemented swipe-card interface, real-time chat, and custom availability matching algorithm

4D Body Scanner for Remote Health Monitoring | COMPLETED

Supervised by Dr. Jeffrey Davis

- Designed rotational scanning system achieving target frame rates for real-time capture
- Implemented 3D reconstruction pipeline using OpenCV, PCL, and ICP/FPFH registration
- Conducted feasibility analysis comparing architectural approaches

EMPLOYMENT EXPERIENCE

Research Assistant

May 2025 – August 2025

MacEwan University

- Designed and built a 4D body scanner integrating multiple Kinect sensors, hardware, and custom C++ software for real-time data acquisition and visualization.
- Developed calibration and alignment methods to merge point clouds into a cohesive dynamic model.
- Demonstrated initiative and self-direction in planning, building, and iterating on a novel research system.

- Server**

April 2022 – Present

OEB Breakfast Co., Edmonton, AB

- Quickly developed positive relations with guests often receiving positive reviews by name after their service.
 - Managed sections of up to 12 tables. Delivered attentive, friendly, and exceptional service.
- General Manager**

January 2022 – April 2022

Doubleshot Bistro, Edmonton, AB

- Launched the food and drink menu of new store from scratch. Created PARs, placed orders, and maintained inventory.
 - Designed standardization procedures
- Supervisor**

October 2018 – January 2022

Starbucks, Edmonton, AB

- Spearheaded the objective to increase Moments of Connections, raising it from 21 to 42 in six weeks.
 - Led an organized, fluid work environment by deploying plays based on the demand of the store and personnel.
 - Effectively de-escalated emotionally charged situations
- Co-op Student**

Three terms from January 2012 to August 2014

Sanjel/ESCO/Packers Plus

- Optimized manufacturing processes using data collection and analysis to reduce time spent within production.
 - Adapted to changing expectations, from change in technical projects, to experience in the field/shop, to working with clients.
 - Gained industry experience in steel manufacturing and oil and gas, specifically well design and downhole drilling.
